

Ellen's story:

My Husband Eddy recently got diagnosed with dementia. He was having trouble for a while and it was becoming more and more noticeable, but we didn't know too much about dementia or Alzheimer's and didn't want to bring it up to the doctor. I found this website doing research on all this stuff. It's hard, but we do feel a little bit better now that we know. We'll make sure he takes care of his health and we'll make it through this together just like we have all these years.
